

Jay Ambe PG API Change Guide

Where API Calls Will Be Added

Current demo data is stored in localStorage. Replace these files first:

- 'src/pgadmin/Utils/pgRequirementStore.js'
- 'src/pgadmin/Utils/allocationHelper.js'
- 'src/pgadmin/Utils/paymentHelper.js'
- 'src/pgadmin/Utils/adminAuth.js'

Recommended Node.js API Routes

Authentication:

- 'POST /api/auth/login'
- 'POST /api/auth/logout'
- 'GET /api/auth/me'

Dashboard:

- 'GET /api/dashboard/overview'
- 'GET /api/action-center'

Properties:

- 'GET /api/buildings'
- 'POST /api/buildings'
- 'POST /api/buildings/:id/floors'
- 'GET /api/rooms'
- 'POST /api/rooms'
- 'PUT /api/rooms/:id'
- 'DELETE /api/rooms/:id'
- 'PUT /api/rooms/:id/layout'

Students and admissions:

- 'GET /api/students'
- 'POST /api/students'
- 'PUT /api/students/:id'
- 'GET /api/admissions'
- 'POST /api/admissions'
- 'PATCH /api/admissions/:id/approve'
- 'PATCH /api/admissions/:id/reject'

Inquiries:

- 'GET /api/inquiries'
- 'POST /api/inquiries'
- 'PUT /api/inquiries/:id'
- 'PATCH /api/inquiries/:id/status'
- 'POST /api/inquiries/import-csv'

Tickets:

- 'GET /api/tickets'
- 'POST /api/tickets'
- 'PUT /api/tickets/:id'
- 'PATCH /api/tickets/:id/status'

Payments and income:

- 'GET /api/payments'
- 'POST /api/payments'
- 'GET /api/invoices'
- 'POST /api/invoices'
- 'GET /api/invoices/:id/pdf'
- 'POST /api/payments/razorpay/order'
- 'POST /api/payments/razorpay/verify'

Expenses:

- 'GET /api/expenses'
- 'POST /api/expenses'
- 'DELETE /api/expenses/:id'

Reports:

- 'GET /api/reports/income?format=excel|pdf'
- 'GET /api/reports/expenses?format=excel|pdf'
- 'GET /api/reports/profit?format=excel|pdf'
- 'GET /api/reports/students?format=excel|pdf'
- 'GET /api/reports/occupancy?format=excel|pdf'
- 'GET /api/reports/inquiries?format=excel|pdf'
- 'GET /api/reports/tickets?format=excel|pdf'
- 'GET /api/reports/transfers?format=excel|pdf'

Calendar and messages:

- 'GET /api/calendar/events'

- 'POST /api/calendar/events'
- 'GET /api/messages'
- 'POST /api/messages/send'
- 'POST /api/whatsapp/send-template'

Transfers:

- 'GET /api/transfers'
- 'POST /api/transfers'

Settings:

- 'GET /api/settings'
- 'PUT /api/settings'
- 'GET /api/validation-preferences'
- 'PUT /api/validation-preferences'

Frontend Files By Module

- Dashboard: 'src/pgadmin/Pages/Dashboard/Dashboard.jsx'
- Action Center: 'src/pgadmin/Pages/Requirements/ActionCenter.jsx'
- Properties: 'src/pgadmin/Pages/Requirements/PropertyManagement.jsx'
- Calendar: 'src/pgadmin/Pages/Requirements/CalendarOperations.jsx'
- Inquiries: 'src/pgadmin/Pages/Requirements/Inquiries.jsx'
- Tickets: 'src/pgadmin/Pages/Requirements/MaintenanceTickets.jsx'
- Income: 'src/pgadmin/Pages/Requirements/PaymentOperations.jsx'
- Expenses: 'src/pgadmin/Pages/Requirements/AccountingManagement.jsx'
- Reports: 'src/pgadmin/Pages/Requirements/Reports.jsx'
- Transfers: 'src/pgadmin/Pages/Requirements/TransferHistory.jsx'

Validation

Validation is soft by default. Enable stricter validation from:

- React helper: 'validateSoft' in 'pgRequirementStore.js'
- MySQL table: 'validation_preferences'

Live Server Rule

React calls Node.js API only. Node.js API connects to MySQL.
